ORACLE ENTERPRISE SINGLE SIGN-ON SUITE PLUS

KEY FEATURES AND BENEFITS

- True single sign-on for all the applications and resources in the enterprise, with no modification required to existing applications
- Saves end users' time and aggravation in having to remember and manage dozens of separate passwords and usernames
- Saves helpdesk time and money in responding to user requests to reset forgotten passwords, providing very high ROI
- Vastly improves password security and eliminates "password sharing", since passwords are now random, strong, and hidden.
- Enables users to securely reset their own Windows passwords, providing additional convenience and cost savings
- Supports secure deployment in "kiosk" environments, where users roam between various workstations, each of which supports multiple users.
- Enables seamless retrofitting of strong, multifactor authentication to the desktop and to all legacy applications, thus meeting mandates such as HSPD-12, and positioning the enterprise for the upcoming convergence of logical and physical security
- The Enterprise Single Sign-on Suite Plus is composed of the following integrated components:

The Oracle Enterprise Single Sign-On Suite Plus (ESSO Suite Plus) is a solution that simplifies ESSO deployments for system administrators while also extending the benefits of Enterprise single sign-on to users who are remote and mobile. For organizations that have users who need access to ESSO from anywhere and at any time, ESSO Suite Plus provides the ability for to click and run ESSO from anywhere. Unlike any other product on the market, ESSO Suite Plus does not require a traditional installation or does not depend on the browser to achieve ubiquitous user access.

On the Go Install of Enterprise Single Sign-On Anytime, Anywhere

Most organizations these days have different types of users like employees, partners and customers who need access to enterprise applications on a regular basis from different locations. The ESSO Suite Plus provides one deployment package and removes the limitations of traditional software installation, allowing enterprises to take advantage of anywhere anytime single sign-on access for employees and partners. Employees get fast, secure access to enterprise applications no matter the location, no matter which computer-whether they are traveling away from the office, roaming between computers, or working at a shared workstation not managed by the enterprise.

Faster Deployments, Updates and Rollback

With traditional software installation a thing of the past, administrators simply host the ESSO Suite Plus online for users to download. Users will download and run ESSO with a simple click of a button from a host website or a network file share. This offers true ESSO portability. This will allows software updates and rollbacks to be applied automatically and managed from a central location. This installation strategy speeds deployments by eliminating the need for scheduled push procedures for installation. The strategy also helps avoid traditional installation problems, such as the need for administrative rights on the destination computer. The deployment packages are version controlled which facilitates easy and more reliable rollbacks.

Enabling ESSO for More Users

Many organizations have remote users, such as hospitals with doctors who have their own private practices. Others have users that have ESSO in one location, but

ORACLE®

Logon Manager, Password Reset, Authentication Manager, Kiosk Manager, Provisioning Gateway and ESSO Anywhere.

- For organizations that have users who must have access to ESSO on any computer at any time, ESSO Suite Plus provides the ability for them to click and run Oracle Enterprise Single Sign-on product from anywhere. Unlike any other product on the market, Oracle Enterprise Single Sign-on does not require a traditional installation or does not depend on the browser to simplify ubiquitous .user access.

not from other locations, and so they still have to remember their passwords, defeating the purpose of ESSO. The on-demand install of ESSO suite Plus brings in true portability and can address ESSO needs for a wider audience in an organization such as for remote, mobile and temporary users, including partners, outsourcers, contractors and other non-employees.

.

Additional Cost Savings using Oracle ESSO Suite Plus

The on-demand install strategy for ESSO suite Plus offers faster deployment and updates of the ESSO products enabling organizations that have costly, laborious and/or slow software distribution processes with a rapid deployment option. For end users, the functionality is identical to that of the Standard ESSO Suite edition. The reliable and simplified updates and rollbacks through versioning is an additional cost saver.

Summary

In a world where security and convenience almost always work at cross-purposes to each other, and where every incremental increase in security typically comes at the cost of a degradation of usability, the Oracle ESSO Suite Plus stands out as a product which offers compelling improvements in security, and at the same time is highly esteemed by the end-user population for the comprehensive improvements in the usability it brings. And not only are the indirect cost savings from reduced user downtime of inestimable value, the product pays for itself in record time from a reduction in direct costs derived from reduced helpdesk staff hours.

The ESSO Suite Plus installation strategy speeds deployments by eliminating the need to perform system integration tests before deploying the software and then relying on desktop refresh or scheduled push procedures for installation. The strategy also helps avoid traditional installation problems, such as the need for administrative rights on the destination computer. In addition, it allows software updates and rollbacks to be applied automatically and managed from a central location.
